

Condition Monitoring Specialist

The right job if you

- want to work with monitoring
- are educated and/or experienced in Condition Monitoring
- are a team player wanting to work in a rapidly developing international company
- know about vibration analysis
- are interested in renewable energy and in contributing positively to the climate

Become a part of Gram & Juhl GmbH

We are searching for an Engineer to become a part of our Condition Monitoring department which is based in Oldenburg, Germany. Take the chance, advance your carrier by being a part of that success, making your innovative personality flourish. The position is very versatile, doing all monitoring related tasks insuring an efficient and reliable setup but also based on your practical work experience contributing to the development of our system. You will be a part of a well-founded team where sparring and agile development is a natural part of everyday work. A firm where quality assurance and performance is key parameters for success.

Your personality is important to us

We are looking for an ambitious and proactive person with a large personal drive. As a person you are forthcoming, have good communication skills and demands high standards from yourself and others thereby insuring high quality work. You are structured, good at maintaining an overview of complex solutions and planning your own work schedule.

Required skills and qualifications

You hold an Mechanical/Software engineering degree or equivalent
Experience in and knowledge of several of the disciplines below:

- Vibration analysis [ISO 18436 certified] and diagnostics
- Signal processing and acoustics
- Linux on a user level
- Business level written and verbal communications skills in English required.
- Your personal description words includes words like enthusiastic, resourceful, self-motivated and persistent.
- Previous experience and knowledge of the wind industry is considered an advantage, but not essential
- Valid work permit for EU required

We offer more than just a job

You will become a part of an international company, striving everyday to secure the sustainable energy resources of the world. As an employee you are given the freedom to act and the inspiration to take responsibility. We offer salary according to qualifications. You will be required to take part in an on call rotation. The primary workplace is at our office in Oldenburg near Bremen, Germany.
